Sleman, Daerah Istimewa Yogyakarta

A fresh graduate of Informatics from Universitas Pembangunan Nasional "Veteran" Yogyakarta with a strong interest in technology development, particularly in Quality Assurance, Web Development, and Data Analysis. During my studies, I gained hands-on experience building web-based systems, automating data pipelines, and ensuring software quality through structured testing and validation processes. I am enthusiastic about continuously learning and adapting to new technologies, and I am ambitious to deliver reliable, well-tested, and data-driven digital solutions that create real impact.

Education

Universitas Pembangunan Nasional Veteran Yogyakarta - DI Yogyakarta

Aug 2021 - Oct 2025

Bachelor of Informatics, 3.52/4.00

- Thesis: Implementation of YOLOv8 for Javanese Script Character Detection in Digital Images
- Built an end-to-end object detection pipeline, covering dataset collection, image annotation, model training, and evaluation using the YOLOv8 architecture.
- Achieved 98,8% mAP (mean Average Precision) on a self-annotated dataset of 2869 Javanese script images, demonstrating consistent detection accuracy across varied digital image conditions.
- Independently managed the full machine learning project lifecycle, from data preprocessing to performance evaluation and reporting.

Experience

Sekretariat Jenderal Kementerian Hukum - DKI Jakarta

Dec 2025 - Jun 2026

Pranata Komputer Intern — Sekretariat Jenderal Kementerian Hukum, DKI Jakarta Maganghub Batch III

- During the internship, I built automated Python scripts to extract procurement planning data from SIRUP, significantly reducing what was previously a manual workload. I also analyzed asset and operational data for Biro BMN, delivering structured reports and interactive dashboards that supported data-driven decision-making within the bureau. In addition, I developed and maintained internal web-based modules including a master data management system and a consultation system ensuring each module was functional, well-structured, and aligned with user requirements prior to deployment.

BPSDM Kementerian PUPR - DKI Jakarta

Jul 2024 - Sep 2024

Bagian Hukum, Kerjasama, Komunikasi Publik, Data dan Teknologi Informasi (Intern)

- As an intern, I developed a responsive web-based Room Booking Information System (SIPAR) using PHP, HTML, CSS, and JavaScript, digitizing the institution's room reservation and management process from end to end. I was actively involved throughout the full software development lifecycle from requirements analysis and system design through to implementation, testing, and iterative refinement in close collaboration with mentors and team members. I conducted structured functional and system testing cycles, documenting and reporting bugs and verifying each fix before final deployment. I also maintained complete technical documentation covering both development and testing processes to support future maintenance and handover.

Junior Web Programmer Training — Haltev x BNSP

Nov 2023 - Dec 2023

Web Development Bootcamp

- Completed a structured web development bootcamp and earned a Junior Web Programmer certification from BNSP (Badan Nasional Sertifikasi Profesi). As the capstone project, I designed a MySQL database schema and built a full-stack book management website using HTML, CSS, JavaScript, and SQL. Throughout the program, I applied best practices in code documentation and debugging to deliver a functional, bug-tested application.

Projects

Sipastiku – Internal Asset Management System (Ministry of Law)

Role: Frontend Developer

- Developed an internal web-based system for the *Biro Barang Milik Negara* at the Ministry of Law.
- Built core features including master data management, interactive dashboards, and consultation modules.
- Collaborated with stakeholders to ensure usability and alignment with internal workflows.
- Tech Stack: HTML, CSS, JavaScript, PHP, MySQL, CodeIgniter

Procurement Data Automation Tool (Python APK)

- Designed and built an automated data extraction tool using Python.
- Integrated with SIRUP (Sistem Informasi Rencana Umum Pengadaan) to retrieve procurement planning data.
- Replaced manual data collection processes with automation.

- Impact: Previously manual → now fully automated, significantly reducing processing time and human effort.
- Tech Stack: Python

SIPAR – Asset and Room Management Information System (Ministry of Public Works and Housing)

Role: *Frontend Developer (Internship Project)*

- Contributed to the development of SIPAR during internship at *BPSDM, Ministry of PUPR*.
- Enhanced UI/UX and implemented responsive web design for better accessibility.
- Improved system usability for managing assets and room reservations.
- Tech Stack: HTML, CSS, JavaScript, PHP, MySQL, CodeIgniter

Unibookstore – Web-Based Online Bookstore

Role: *Fullstack Developer (Bootcamp Project – Haltev, BNSP Certification)*

- Developed an online bookstore platform as part of *Junior Web Programmer (BNSP)* certification program.
- Implemented features such as product catalog, shopping cart, and transaction handling.
- Built responsive UI for seamless user experience across devices.
- Tech Stack: HTML, CSS, JavaScript, PHP, MySQL

GreenCycle – UI/UX Design Project

Role: *UI/UX Designer (Academic Project)*

- Designed a mobile app prototype focused on waste management and environmental awareness.
- Created user flows, wireframes, and high-fidelity UI designs.
- Focused on intuitive design and user-friendly experience.
- Tools: Figma

Certificate

Junior Web Programmer - BNSP (Badan Nasional Sertifikasi Profesi)	Jan 2024 - Jan 2027
<i>Certificate No. 62090 2513 3 0080101 2024 Valid: January 2024 - January 2027</i>	
Pranata Komputer Internship - Sekretariat Jenderal, Kementerian Hukum	Dec 2025 - Jun 2026
<i>Certificate No. MN.031.004273.03.2025 Issued by Kemnaker RI via Maganghub Completed with distinction: Sangat Baik (Very Good)</i>	

Volunteers

Borobudur Marathon	
Water Station Crew	2023
Managed hydration station operations for hundreds of runners in a high-pressure race environment, coordinating distribution flow and restocking to ensure continuous and efficient support throughout the event.	
Sedayu Art Event (High School)	
Security Team	2020
Maintained crowd control and ensured event safety for large-scale attendees by monitoring movement and handling potential disruptions to support smooth and orderly event operations.	

Technical Skills

- **Data Analysis & Machine Learning:** Python, YOLOv8, Data Visualization, Dashboard Reporting
- **Databases:** SQL, MySQL
- **Programming Languages:** Python, Java, C/C++, JavaScript, Dart - Web Development: PHP, HTML, CSS, JavaScript
- **Tools & Design:** Canva, UI/UX Design Fundamentals
- **Soft Skills:** Effective Communication, Adaptability, Responsibility, Team Collaboration, Continuous Learning
